Look,

Look,

Please answer more prompt and timely. We live in the new millenium during the information age. You can just answer questions. They should be easy. Otherwise, these non-credible rationalizations are for more retaliatory harassment with procrastination and delay to obstruct against rights.

This is even more of a long train of abuse of process. I am in a hurry. This is large part due to delays subject to my complaints. I need access to my account now. Please don't collude to overburden with more impeding obstacles that keep continuing. I need the due, procedural help right now!

This is very frustrating, and as should be obvious from the aforementioned, I have no time to mince words any longer. It has been a long time of continual denial maliciously. All representatives and caseworkers are being totally illegal shrews with underlying criminal motives. Where do I address this? Could I get a cogent, timely answer? Are you legitimate, or are you a planted mole recently? A diversion? Please answer honestly. What the heck does "ombuds..." have anything relevant to do with this agency's function? An "ombudsman, as a title (although it may seem to such as a ruskie to sound authoritative confusedly) serves a function at broadcasting stations to inspect

to sound authoritative confusedly) serves a function at broadcasting stations to inspect script concerning FCC regulations, but, therefore, is completely useless, by its definition, for any purpose within a welfare agency. What is this title for I have been referred to? Bizarre mis-vocabulary... And this after I have called multiple lines informed about for weeks and rudely obstructed by them all. I have record of all of this (as you do know certainly -- as I mentioned, it's the information age).

Review phone calls recorded "for quality assurance" allegedly (again) in my case and do not yourself retaliate depriving recourse by right illegally. They will, whether or not you unbiasedly interpret them or not, validate this accusation.

Yours truly,

James E. Horton (per case #: 341BTN89)
